Reported Symptoms / Problem

I have pimples and blackheads on my face

Combined AI Analysis

Final Assessment : Acne

Image & Symptoms Match : MATCH

Combined Confidence : Low

AI Assessment

The image model prediction of Acne is highly consistent with the user's reported symptoms of pimples, blackheads, and clogged pores. Please note that this combined result is suggestive and does not constitute a confirmed medical diagnosis.

Recommended Care

Wash the affected area gently twice daily using a mild, non-abrasive cleanser. Avoid squeezing, scratching, or popping blemishes to lower the risk of scarring and inflammation. Select non-comedogenic skincare and sunscreen products.

Combined Medicine Information

Over-the-counter topical treatments containing salicylic acid or benzoyl peroxide can help reduce excess oil and unclog pores. Discontinue use if severe irritation occurs.

Combined Doctor Advice

Please consult a certified dermatologist for an accurate, in-person examination and a personalized treatment strategy.

Disease Information

Acne is a common skin condition that can occur when hair follicles become clogged with oil and dead skin cells.

Medicine / Treatment Information

Treatment depends on the type and severity of acne. Products containing ingredients such as benzoyl peroxide or salicylic acid may be used in some cases. Consult a healthcare professional for appropriate treatment.

General Care / Home Remedy

Gently clean the affected area, avoid squeezing pimples, and use non-comedogenic skincare products.

Doctor Advice

Consult a dermatologist if acne is severe, painful, persistent, or causing scarring.
