AI-Assisted Skin Analysis Report

User : Meet

Image Analysis

Prediction : Acne vulgaris

Confidence : 95%%

Reported Symptoms / Problem

I have pimples and blackheads on my face.

Combined AI Analysis

Final Assessment : Acne vulgaris

Image & Symptoms Match : MATCH

Combined Confidence : Low

AI Assessment

The image model prediction of Acne is highly consistent with the reported symptoms of clogged pores, excess sebum, and related lesions. While the image analysis and symptom profile strongly align with Acne vulgaris, this finding is an automated assessment and not a confirmed medical diagnosis.

Recommended Care

Wash your face twice daily with a gentle cleanser, avoid squeezing or popping blemishes, and use oil-free, non-comedogenic skincare products.

Combined Medicine Information

Over-the-counter topical treatments containing salicylic acid, benzoyl peroxide, or adapalene may help reduce clogged pores and inflammation.

Combined Doctor Advice

Please consult a qualified dermatologist for a proper in-person skin evaluation and a personalized treatment plan.

Disease Information

No information is available for this AI prediction.

Medicine / Treatment Information

Please consult a qualified healthcare professional.

General Care / Home Remedy

Avoid self-treatment based only on an AI prediction.

Doctor Advice

Consult a dermatologist or qualified healthcare professional.
