Prediction : Acne Vulgaris

Confidence : 95%%

Reported Symptoms / Problem

pimples/blackheads/clogged pores on face

Combined AI Analysis

Final Assessment : Acne Vulgaris

Image & Symptoms Match : MATCH

Combined Confidence : Low

AI Assessment

The image model prediction of Acne aligns well with the user's reported symptoms of suspected Acne Vulgaris, which describe clogged hair follicles caused by excess sebum, dead skin cells, and bacteria.

Recommended Care

Wash affected skin twice daily using a gentle, non-comedogenic cleanser. Avoid picking, squeezing, or popping blemishes, and consistently use oil-free skincare and sunscreen products.

Combined Medicine Information

Over-the-counter topical agents containing salicylic acid, benzoyl peroxide, or adapalene may help unclog pores and manage breakouts. Use these ingredients as directed to minimize skin irritation.

Combined Doctor Advice

This preliminary skin assessment is not a confirmed medical diagnosis. Please schedule an appointment with a qualified dermatologist for an accurate evaluation and a tailored treatment plan.

Disease Information

No information is available for this AI prediction.

Medicine / Treatment Information

Please consult a qualified healthcare professional.

General Care / Home Remedy

Avoid self-treatment based only on an AI prediction.

Doctor Advice

Consult a dermatologist or qualified healthcare professional.
