AI-Assisted Skin Analysis Report

User : Meet

Image Analysis

Prediction : Inconclusive

Confidence : 15%

Reported Symptoms / Problem

I have red itchy dry patches on my hands.

Combined AI Analysis

Final Assessment : Inconclusive

Image & Symptoms Match : MISMATCH

Combined Confidence : Low

AI Assessment

There is a clear mismatch between the image analysis and the reported symptoms. The image model predicted Acne, whereas the reported symptoms involve hand eczema or contact dermatitis triggered by handwashing and irritants on the hands. Because the affected location and symptom profile conflict with typical acne, the overall assessment is inconclusive.

Recommended Care

Focus on general, safe skin care for irritated skin on the hands. Wash hands using lukewarm water and gentle, fragrance-free cleansers. Apply a thick moisturizing cream or ointment frequently, especially after washing, and wear protective gloves when doing household chores or handling harsh chemicals.

Combined Medicine Information

Over-the-counter hydrocortisone cream or soothing emollients may provide temporary relief for itching and irritation. Please consult a pharmacist or physician before starting any new medication.

Combined Doctor Advice

It is strongly advised to consult a dermatologist or qualified healthcare professional for an in-person evaluation. A visual assessment by a professional is necessary to accurately diagnose the condition and recommend an appropriate treatment plan.

Disease Information

The image prediction and reported symptoms do not sufficiently match. The result is inconclusive and should not be treated as a confirmed diagnosis.

Medicine / Treatment Information

Over-the-counter hydrocortisone cream or soothing emollients may provide temporary relief for itching and irritation. Please consult a pharmacist or physician before starting any new medication.

General Care / Home Remedy

Focus on general, safe skin care for irritated skin on the hands. Wash hands using lukewarm water and gentle, fragrance-free cleansers. Apply a thick moisturizing cream or ointment frequently, especially after washing, and wear protective gloves when doing household chores or handling harsh chemicals.

Doctor Advice

It is strongly advised to consult a dermatologist or qualified healthcare professional for an in-person evaluation. A visual assessment by a professional is necessary to accurately diagnose the condition and recommend an appropriate treatment plan.
