AI-Assisted Skin Analysis Report

User : Meet

Image Analysis

Prediction : Eczema

Confidence : 92%%

Reported Symptoms / Problem

I have itchy, red, dry and irritated patches on my hands. My hands become worse after frequent handwashing and using soap.

Combined AI Analysis

Final Assessment : Eczema

Image & Symptoms Match : MATCH

Combined Confidence : Low

AI Assessment

The image-model prediction of Eczema is consistent with your reported symptoms of hand dryness, irritation, and inflammation triggered by frequent water and soap exposure. Please note that this assessment is not a confirmed medical diagnosis.

Recommended Care

Wash hands with lukewarm water and a gentle, fragrance-free cleanser. Apply a thick moisturizing cream or petroleum jelly immediately after washing while skin is damp. Wear protective gloves when doing household chores to protect the skin barrier.

Combined Medicine Information

An over-the-counter mild hydrocortisone cream may provide temporary relief from redness and itching. Avoid long-term use without consulting a medical professional.

Combined Doctor Advice

Consult a dermatologist for a definitive diagnosis, precise evaluation, and tailored prescription treatment plan.

Disease Information

Eczema is a group of conditions that can cause dry, itchy, irritated, or inflamed skin.

Medicine / Treatment Information

An over-the-counter mild hydrocortisone cream may provide temporary relief from redness and itching. Avoid long-term use without consulting a medical professional.

General Care / Home Remedy

Wash hands with lukewarm water and a gentle, fragrance-free cleanser. Apply a thick moisturizing cream or petroleum jelly immediately after washing while skin is damp. Wear protective gloves when doing household chores to protect the skin barrier.

Doctor Advice

Consult a dermatologist for a definitive diagnosis, precise evaluation, and tailored prescription treatment plan.
