AI-Assisted Skin Analysis Report

User : Meet

Image Analysis

Prediction : Inconclusive

Confidence : 15%

Reported Symptoms / Problem

I have dry, red and itchy patches on my hand for 5 days.

Combined AI Analysis

Final Assessment : Inconclusive

Image & Symptoms Match : MISMATCH

Combined Confidence : Low

AI Assessment

There is a clear mismatch between the image model prediction and the user-reported symptoms. The image model predicted Acne, which typically presents with pimples or clogged pores on the face, chest, or back. In contrast, the user reports dry, red, and itchy patches on the hands, which aligns with hand eczema or contact dermatitis rather than acne.

Recommended Care

Focus on gentle, supportive skin care for irritated skin. Apply a thick, fragrance-free moisturizer regularly, particularly after washing your hands. Use lukewarm water and mild, soap-free cleansers. Avoid exposure to harsh soaps, detergents, or chemical irritants.

Combined Medicine Information

Avoid using acne treatments, as they can cause further dryness and irritation. An over-the-counter mild hydrocortisone cream may provide temporary relief for itching and redness on the hands, but consult a healthcare professional or pharmacist before use.

Combined Doctor Advice

Please consult a dermatologist or qualified physician for a professional clinical evaluation, accurate diagnosis, and personalized treatment plan.

Disease Information

The image prediction and reported symptoms do not sufficiently match. The result is inconclusive and should not be treated as a confirmed diagnosis.

Medicine / Treatment Information

Avoid using acne treatments, as they can cause further dryness and irritation. An over-the-counter mild hydrocortisone cream may provide temporary relief for itching and redness on the hands, but consult a healthcare professional or pharmacist before use.

General Care / Home Remedy

Focus on gentle, supportive skin care for irritated skin. Apply a thick, fragrance-free moisturizer regularly, particularly after washing your hands. Use lukewarm water and mild, soap-free cleansers. Avoid exposure to harsh soaps, detergents, or chemical irritants.

Doctor Advice

Please consult a dermatologist or qualified physician for a professional clinical evaluation, accurate diagnosis, and personalized treatment plan.
